BM floor system	02-04	A
Slope floor system	05-06	B
Adjustable floor system	07-10	C
DT300 flexible stage	11-12	D
Square extrusion floor system	13-15	E
8-way floor system	16-17	F

B: Pre-milled-hole

B: Put the clip into the hole

Fasten the screw, fixed

Application

Components

LT-Z400A 50 Beam extrusion	LT-Z981F Tension Lock	LT-AC2028 Slope extrusion	15mm Interlocking floor panel

Installation method

01 Use lock to connect two beams	02 Install aluminum frames structure	03 Install the floor panels
04 Fix slope extrusion (or 45 degree joint)	05 Finish installation	Side view of the floor

Adjustable foot floor system

LT-HF1

Adjustable foot (zinc)
 1.Min height:55mm
 Max height:100mm
 2.Loading capacity:2000kg
 3.N.W.:814g

LT-KL1

Flush bolt (zinc)
 1.Used in the middle of two
 40mm panels to enforce
 the structure
 2.LT-KL1 is spring structure,
 used to level two panels
 3.N.W.:168g

Adjustable floor system

LT-MPL3 LT-SPL3

LT-MPL3 and LT-SPL3 are in the same size, to be put on the adjustable foot, can put flush bolt in the middle of two panels.
 LT-MPL3: Plywood panel
 Loading capacity:1000kg/㎡
 N.W.:22kg
 LT-SPL3: MDF panel
 Loading capacity:2000kg/㎡
 N.W.:18kg

LT-MPL4 LT-SPL4

LT-MPL3 and LT-SPL3 are in the same size, to be put on the adjustable foot, can put flush bolt in the middle of two panels.
 LT-MPL4: Plywood panel
 Loading capacity:1000kg/㎡
 N.W.:11kg
 LT-SPL4: MDF panel
 Loading capacity:2000kg/㎡
 N.W.:9kg

LT-DH101-60

1.Acrylic panel can be installed on the side of the floor panel, and then covered with L shape aluminum extrusion
 2.Use screws to fix it to floor panel

LT-DH101-100

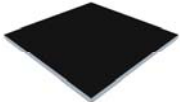

1.Covering extrusion used in floor system
 2.Use screws to fix it to floor panel

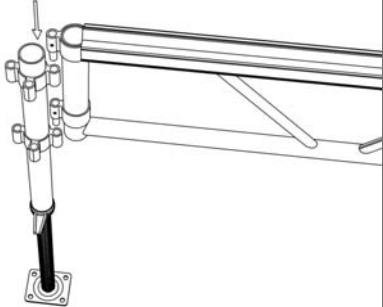

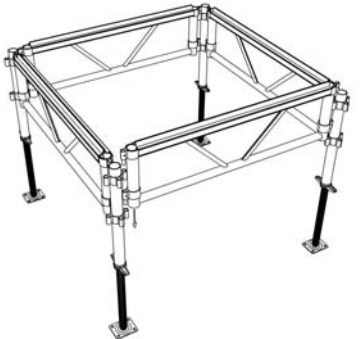

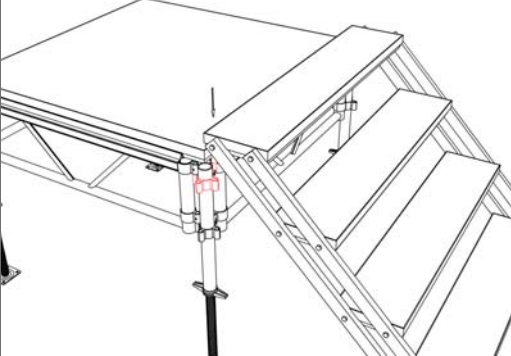

Components

				
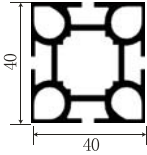

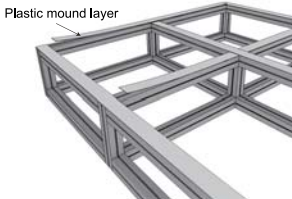

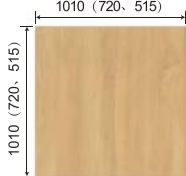

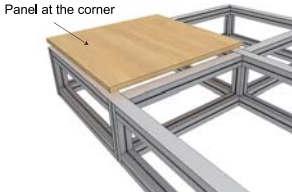

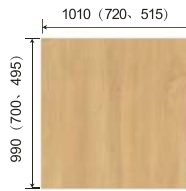

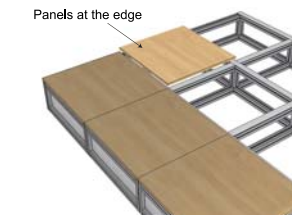

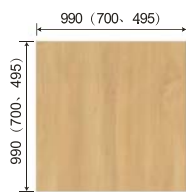

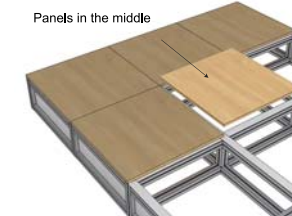

Adjustable leg	Connect frames	1220*1220 stage panel	Foot step board	Stage stair

Installation

 <p>01 Insert connect frames into adjustable leg</p>	 <p>02 Install the whole framework step by step</p>
 <p>03 Install the stage panel</p>	 <p>04 Set stage stair on to framework</p>

Application case

<p>LT-M311</p>   <p>LT-M311</p> <p>LT-M311</p>	<p>LT-M311, 40x40mm square extrusion is used for upright and beams. Suggested max height is 1000mm. The finish of square extrusion can be oven painted in different colors.</p>
<p>Rubber strip</p>   <p>Plastic mould layer</p>	<p>To put on the top of the square extrusion, to avoid the glass from sliding down and break.</p>
<p>Panels at the corner</p>   <p>Panel at the corner</p>	<p>Standard size: 990*990mm, 700*700mm, 495*495mm Panel above profile</p>
<p>Panels at edge</p>   <p>Panels at the edge</p>	<p>Three types: Corner Panel(1010*1010mm, 720*720mm, 515*495mm), Edge Panel(1010*990mm, 720*700mm, 515*495mm), Middle Panel (990*990mm, 700*700mm, 495*495mm)</p>
<p>Panels in the middle</p>   <p>Panels in the middle</p>	<p>The panels can be changed to glass or other materials. If choosing glass, must choose tempered glass, thickness should be 12mm to 24mm, the surface of the glass, you can choose transparent, frosted or oven paint.</p>

Installation method of 40mm square extrusion floor

01

Place LT-M311 first, lock the beam on the bottom, then insert the decorative panel, lock the beam on the above.

02

After installation of main frame, then wire and install modulator tubes

03

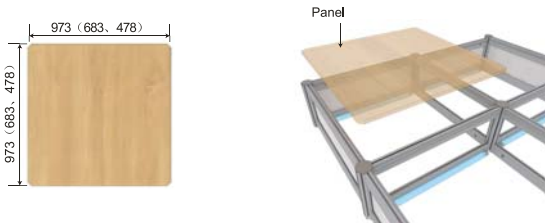

After installation of modulator tubes, spread plastic layer, then spread the floor panels.

04

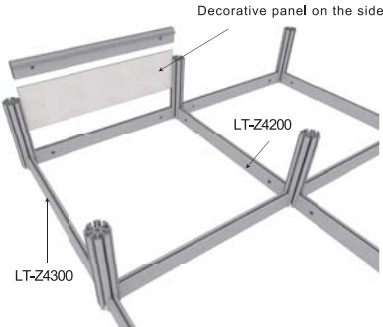

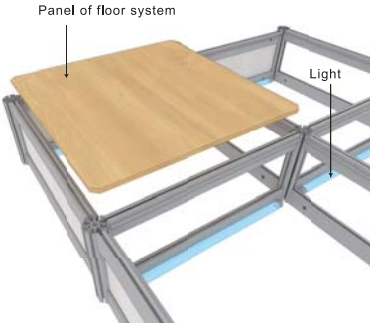

Platform after installation

LT-S100		<p>1.LT-S100(upright extrusion) is used as upright post in the floor structure. (Suggested max height is 1000mm)</p> <p>2.The finish of aluminum profile can be oven painted</p>
LT-Z4300		<p>LT-Z4300 (beam extrusion with single side)is used as beam at the edge of structure</p>
LT-Z4200		<p>1.LT-Z4200(beam extrusion with double sides) is used as beam in the middle of structure</p> <p>2.As per different installation ways showed in the picture, you can choose 10mm or 28mm floor panel.</p>
Floor panel		<p>1.Standard structure size: 990*990mm,700*700mm,495*495mm, Normal thickness:10mm(glass is better) or 28mm(glass or board)</p> <p>2.Accordingly, size of floor panel: 937*937mm,683*683mm,478*478mm</p> <p>3.Panel of standard floor system can be glass or board, but it must be tempered glass, the surface of the glass, you can choose transparent, frosted or oven paint.</p>
LT-S132		<p>LT-S132 is the plastic end cover of upright extrusion LT-S100.</p>

Installation

01		02	
First, lock the upright extrusions and the bottom extrusions, insert the side panels, then lock the top beams		Arrange wires, lights, put the top panels	
03		04	
Put the end cover after putting the top panels		Fully assembled
