LT-KITS

Information About Us:

LINGTONG

Was founded in 1986, and we have more than 20 years experience of Aluminum Modular Exhibition System. We supply thousands of aluminum extrusions, truss, accessories and also fabric system products. We offer good quality system products on basis of safety structures. You may see our LT System all over the world, such as in Germany, USA, Japan & China. Meanwhile, our products especially Maxima & Fabric system products are sold very well in American market.

We're honoured to offer our continuous favor for our business partners.

And now we have upgraded our LT-Kits System and present to you at the moment.

If you need a booth which can be crated into only one small box, which should be pretty easy for both transportation and installation. This system is similar with Mc Donalds.

It's absolutely DIY. You choose what you want.

It's really a funny job! Come on!

DO IT NOW!

LT-KITS made by seven parts

There are a couple of options for each system component, you may choose what you want. And you may try to crate all the stuff into boxes.

For instance:

I CHOOSE I WANT !

Background(B)

If you want to make the curved background wall, you just need to add extra A

behind BXXX,
for example: BXXXXa

main profiles

60mm extrusion

40mm beam

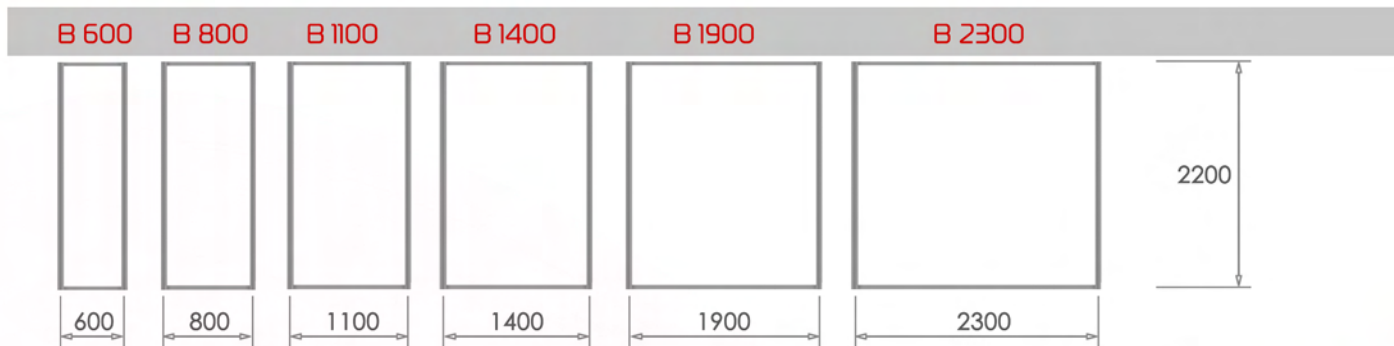

fix fabric extrusion

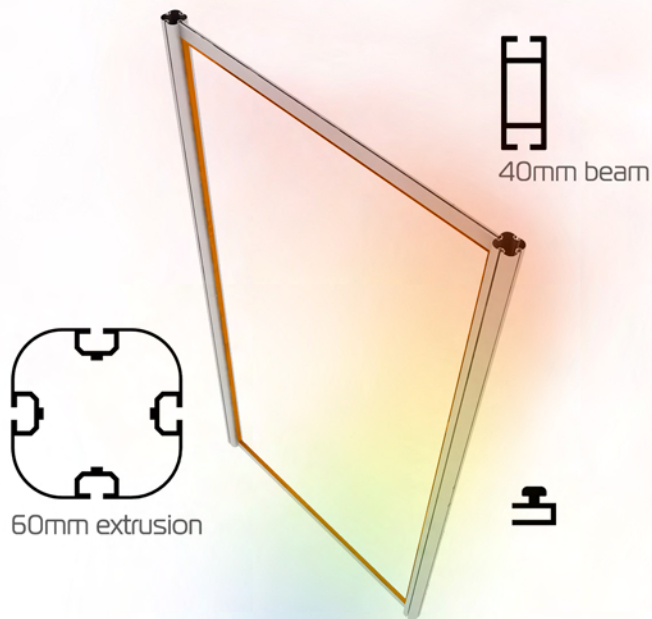

NOTICE: When you install orange color fabric extrusion, make sure the groove side should face the front position.

LT-KITS

We have six sizes

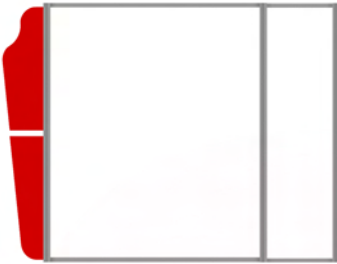

main profiles (Aluminum)

The **orange** profile is used to fix fabric graphics. You may also use 4mm or thinner rigid panels if you need.

NOTICE: When you install **orange** color fabric extrusion, make sure the groove side should face the front position.

Laminated Shelf (L)	✓	✓	✗	✗	✗	✗

LT-KITS

background install

HOW TO CONNECT THE BACKGROUND WALL?

Our standard crate size is
1200mm x 600mm x 800mm.

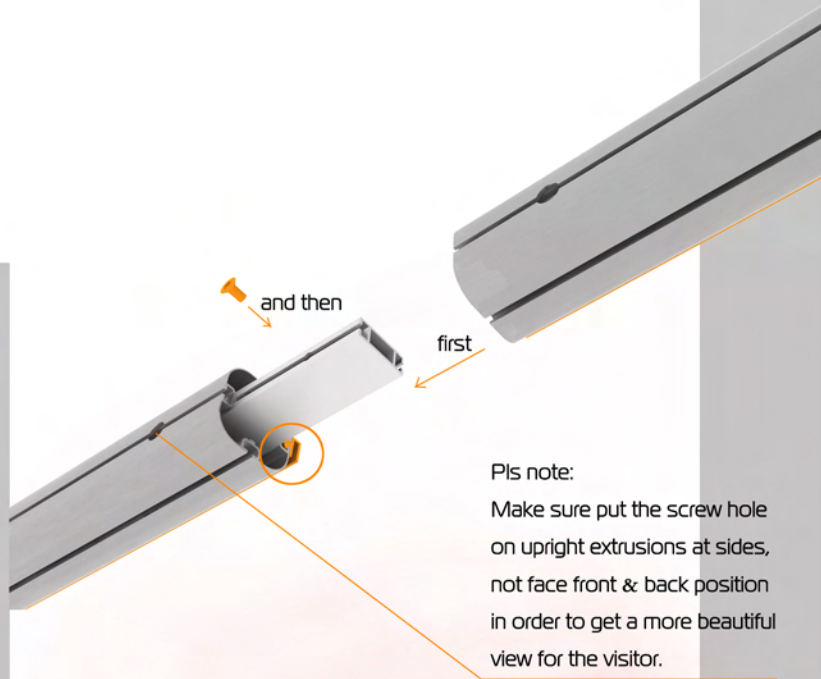

Thus the length of each extrusion
should be less than 1200mm.

For example :

The upright is extended by two parts.

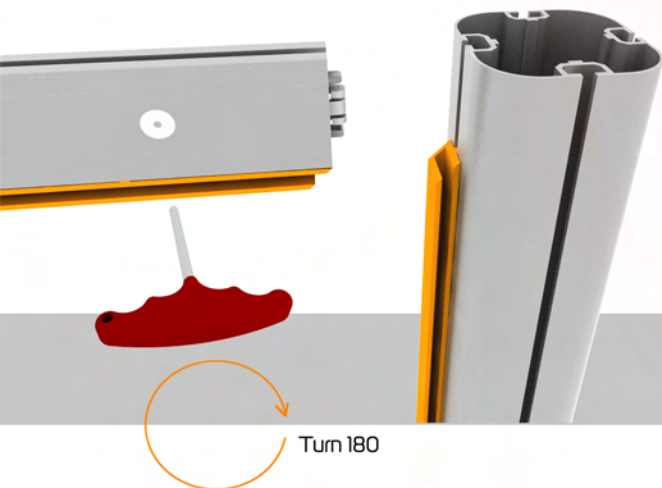

You can install them by this way.

See pictures:

Pls note:

Make sure put the screw hole
on upright extrusions at sides,
not face front & back position
in order to get a more beautiful
view for the visitor.

The orange extrusion
is used to fix fabric graphics.

LT-KITS

choose you want

The SIDE WINGS are made of panels less than 8mm thick.

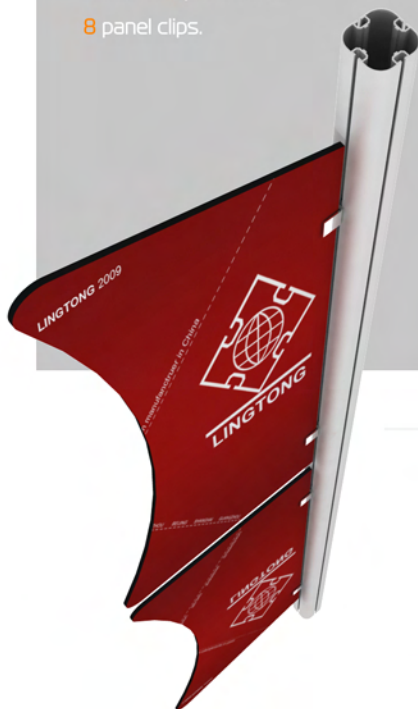

There are acrylic and foamed PVC 2 options.

Colors and graphics are customised.

Meanwhile, 1 set of side wing

includes 4 panels and
